The School Nursing Service

School Nurses are qualified nurses with additional training to identify a child or young person's health needs. The School Nurse:

- Works with children from the age of 4 years up to when they leave school
- Provides advice and support for parents, children and young people about eating behaviour, obesity, asthma, epilepsy, allergies, sleep, bed-wetting and soiling
- Works in partnership with parents, school staff, GPs, Health Visitors and other agencies e.g. Social Services
- Provides a confidential drop-in service for young people to talk about concerns affecting their health

What do the School Nurse Team do?

Health Screening

During the first year of primary school your child will have health screening that includes height, weight, vision and hearing tests.

Medical tape may be used to cover eyes during all vision tests therefore please let the School Nurse team know if your child has an allergy to medical tape.

Screening will be carried out at each school in rotation during the school year.

You will receive confirmation of the results of your child's health screening. If there are any outstanding health issues the School Nurse will offer you an appointment with herself or the Community Paediatrician.

Please complete the enclosed questionnaire and return it to the school within three days of receipt.

Additional Health Advice

Headlice are a common problem in the community and parents are advised to check their child's hair weekly and treat if necessary.
The School Nurse is available to advise you if necessary.

Opticians provide free eye tests for all children. If at anytime you become concerned about your child's vision either arrange an appointment with your local Optometrist / Optician.

Immunisation

Children are offered immunisations in line with the National Vaccination Policy.

A signed consent form is required for each immunisation. This will be sent to you prior to any immunisation being due.

Further information is available from your School Nurse Team.
